EXHIBIT C — AWARD EVIDENCE PACKET

The Halvorsen Medal in Energy Storage Engineering, 2024

Recipient: Dr. Anselm Ferreira-Duarte

Compiled by Meloy & Trant LLP, October 2025. Contents are listed at C-1 through C-6 below.

C-1. THE GRANTING ORGANIZATION

The Continental Society for Energy Storage Engineering (CSESE) is a professional and learned society incorporated in 1974, with its secretariat at 300 Marchmont Row, Halifax, Nova Scotia. Its stated purpose is the advancement of engineering practice in electrical and electrochemical energy storage.

Extracted from the Society's 2024 Annual Report, filed with its members and published on its public register:

- Individual members: 41,880, resident in 63 countries.
- Corporate and institutional members: 1,214, including 38 utilities, 22 national laboratories and 61 universities.
- Regional chapters: 29, across North America, Central and South America, and affiliated chapters in Europe and East Asia.
- Publications: the Society publishes three peer-reviewed journals and the *CSESE Storage Practice Code*, referenced by four state public utility commissions.
- Annual congress: the 2024 congress in Belo Horizonte, Brazil, registered 6,340 attendees from 41 countries.

The Society is not affiliated with, funded by, or otherwise connected to Voltaris Grid Dynamics, Inc., the Kessendra Institute of Applied Energetics, or Dr. Ferreira-Duarte.

C-2. THE AWARD, ITS BYLAWS AND ITS SELECTION CRITERIA

The Halvorsen Medal was endowed in 1997 by bequest of Ingrid Halvorsen-Baak and has been conferred annually since 1998. The following is reproduced from Article 9 of the CSESE Bylaws, revised edition of March 2023, which is published in full on the Society's public register.

9.1 Purpose. The Halvorsen Medal in Energy Storage Engineering shall be conferred annually upon one individual whose published or applied engineering work has, in the judgement of the Medal Panel, materially advanced the safety, reliability, or efficiency of stored electrical energy systems.

>

9.2 Eligibility. Any engineer or scientist working in the field is eligible without regard to nationality, place of residence, employer, or membership in the Society. Self-nomination is not permitted.

>

9.3 Criteria of assessment. The Medal Panel shall assess candidates solely on the following,

in the order stated: (a) the originality of the candidate's technical contribution; (b) the demonstrated adoption of that contribution by parties independent of the candidate; (c) the measurable improvement in safety, reliability, or efficiency attributable to it; and (d) the durability of the contribution over not fewer than three years. Standing, seniority, employer, and institutional affiliation shall not be considered.

>

9.4 The Medal Panel. The Panel shall consist of seven members: the immediate past President of the Society, four members appointed by the Council from among persons holding senior academic or engineering appointments in the field, and two members nominated by the Society's affiliated national bodies. No panelist may serve who is employed by, has co-authored with, or has a financial interest in any organization employing a candidate under consideration.

>

9.5 Procedure. Nominations close on 31 January. The Panel shall reduce nominations to a shortlist of not more than six, each of whom shall be assessed against Article 9.3 in a written report. The Medal shall be conferred by not fewer than five of the seven votes. Where no candidate attains five votes, the Medal shall not be conferred that year. The Medal has been withheld in 2003, 2009 and 2017.

C-3. THE 2024 CYCLE

From the Report of the Medal Panel to the CSESE Council, dated 14 April 2024:

Nominations received	214
Countries of nominees' residence	27
Shortlisted	6
Votes recorded for the recipient	7 of 7
Conferred at	CSESE Annual Congress, Belo Horizonte, Brazil, 22 September 2024

Panel composition for the 2024 cycle, with qualifications as published in the Congress programme:

Panelist	Appointment
Dr. Ingeborg Vasquez-Thiel (Chair)	Immediate Past President, CSESE; formerly Director of Storage Research, Tarnwell National Laboratory
Prof. Marcus Delahaye-Oduya	Professor of Electrochemical Engineering, Ravensmoor University
Prof. Sunniva Kettleborough	Chair of Power Systems, Aldercross Institute of Technology
Dr. Beatriz Sanmartín-Roche	Director of Grid Reliability, Instituto Nacional de Redes Eléctricas
Dr. Owen Prescott-Nyathi	Principal Engineer, Cordwainer Electric Cooperative
Prof. Hana Lindqvist-Ferrer	Chair of Applied Electrochemistry, Nordkilde Technical University
Dr. Ademola Frankham-Ige	Chief Engineer, West African Grid Reliability Board

The Panel's published citation of the award, in English, reads in relevant part:

"For Drift-Indexed Impedance Spectroscopy, a method of cell-level fault detection which, in the four years since its publication, has passed into general engineering practice, has been

incorporated into a North American safety standard, and has been implemented independently by operators on three continents. The Panel notes in particular the criterion at Article 9.3(b): the evidence of adoption by parties wholly unconnected to the candidate was, in this cycle, without equal."

C-4. ORIGINAL CITATION DOCUMENT

The engrossed citation presented at the Belo Horizonte congress was issued by the host chapter in the Portuguese language. A photographic copy is enclosed. An English summary of its contents prepared by counsel is set out below. The engrossed citation records the recipient's name, the name of the award, the date and place of conferral, the signature of the Chair of the Medal Panel and of the President of the Society, and a one-sentence statement of the ground of the award corresponding to the English citation reproduced at C-3.

C-5. PRESS COVERAGE

Coverage of the 2024 conferral outside the Society's own membership publications:

Date	Publication	Headline	Circulation / reach
23 Sep 2024	*Grid & Storage Weekly* (trade, North America)	"Halvorsen Medal goes to drift-indexing pioneer"	74,000 paid subscribers
24 Sep 2024	*Folha Industrial de Minas* (general daily, Brazil)	"Engenheiro brasileiro recebe medalha internacional em Belo Horizonte"	188,000 daily print
26 Sep 2024	*The Utility Engineer* (trade, United Kingdom)	"Cell-level detection method takes top storage prize"	31,000
1 Oct 2024	*Nordic Energy Review* (trade, Scandinavia)	"Halvorsen 2024: impedance drift comes of age"	22,500
14 Oct 2024	*Continental Power Business* (trade, North America)	"What the Halvorsen Medal tells you about where storage safety is going"	96,000

C-6. RECIPIENTS SINCE 1998

The Medal has been conferred 24 times in 27 cycles. Recipients and their positions at the time of conferral:

Year	Recipient	Position at conferral
2024	Dr. Anselm Ferreira-Duarte	Principal Research Engineer, Voltaris Grid Dynamics, Inc.
2023	Prof. Sunniva Kettleborough	Chair of Power Systems, Aldercross Institute of Technology
2022	Dr. Yusuf Brannigan-Adeyi	Director, Storage Division, Tarnwell National Laboratory
2021	Prof. Camille Descoteaux-Wren	Professor of Electrochemistry, Ravensmoor University
2020	Dr. Hyun-Seo Vandergraaf	Chief Scientist, Meridian Foundation for Applied Energy Research
2019	Prof. Aurelio Manteiga-Blythe	Director, Instituto Nacional de Redes Eléctricas
2018	Dr. Ingeborg Vasquez-Thiel	Director of Storage Research, Tarnwell National Laboratory

2017	*not conferred*	
2016	Prof. Delia Onwuachi-Hart	Chair of Energy Systems, Nordkild Technical University
2015	Dr. Piotr Sandoval-Reape	Chief Engineer, Continental Storage Consortium
(1998–2014 list continues in the enclosed Society register extract)		

Of the 24 recipients, 19 held chaired professorships or national laboratory directorships at the time of conferral or were appointed to one within five years. Six have subsequently served as President of the Society.
