

Fictional sample created for software testing. All names, entities, numbers, and dates are invented.

## EXHIBIT B

### CURRICULUM VITAE

Ilona Marta Brasch, Ph.D.  
4177 Quarry Bend Drive, Apt. 12B, Sparks, NV 89436  
i.brasch@halideloop.example · (775) 555-0248  
Citizenship: Estonia · Current status: O-1A, valid through March 2027

---

### EDUCATION

| Years | Degree | Institution |  
|---|---|---|  
| 2015–2019 | Ph.D., Chemical Engineering. Dissertation: \*Layered Manganese-Oxide Sorbents for Selective Lithium Capture from Multi-Ion Brines\* | Väinamere Technical University, Tartu, Estonia |  
| 2013–2015 | M.Sc., Chemical Engineering, with distinction | Väinamere Technical University, Tartu, Estonia |  
| 2010–2013 | B.Sc., Applied Chemistry | Väinamere Technical University, Tartu, Estonia |

Doctoral supervisor: Prof. Dr. Kaarel Timm.

### POSITIONS

Founder and Chief Technology Officer — Halide Loop Technologies, Inc., Sparks, Nevada (June 2023 – present)  
Direct all process development. Designed the HL-2 sorbent membrane module. Lead a team of four engineers and two technicians. Responsible for the field program at the Pyramid Ridge slipstream installation.

Postdoctoral Research Associate — Separations Laboratory, Cascadia Institute of Technology, Portland, Oregon (September 2020 – May 2023)  
Led the real-brine test campaign. Reduced the sorbent regeneration cycle from 14 hours to 3.5 hours. Supervised two graduate students.

Process Engineer — Nordhaven Brine Systems OÜ, Pärnu, Estonia (July 2019 – August 2020)  
Column design and scale-up for industrial water treatment.

### PEER-REVIEWED PUBLICATIONS

1. Brasch, I. M. "Selectivity limits of layered manganese-oxide sorbents in calcium-dominated brines." \*Journal of Selective Separations\*, 14(3), 2022, 211–229.
2. Brasch, I. M., and Achterberg, R. "A three-and-a-half-hour regeneration cycle for lithium-selective sorbents." \*Journal of Selective Separations\*, 14(8), 2022, 776–791.
3. Brasch, I. M. "Silica fouling of sorbent membranes under continuous geothermal service." \*Applied Brine Chemistry Letters\*, 9(2), 2024, 55–68.
4. Achterberg, R., Brasch, I. M., and Oyelaran, T. "Field validation of wellhead lithium

- recovery at 1,900 hours." *\*Applied Brine Chemistry Letters\**, 10(1), 2025, 3–24.
5. Brasch, I. M. "Sorberent attrition as a cost driver in direct lithium extraction."  
*\*Minerals Process Engineering Review\**, 31(4), 2025, 402–418.
6. Brasch, I. M., and Timm, K. "Ion exchange kinetics in layered manganese oxides."  
*\*Baltic Journal of Process Chemistry\**, 7(1), 2019, 44–61.

#### INVITED TALKS

- Keynote, International Symposium on Critical Mineral Recovery (ISCMR 2024), Calgary, Alberta — "What the brine actually does to your sorberent."
- Invited seminar, Great Basin Geothermal Operators Forum, Elko, Nevada, 2025.
- Panelist, Western Critical Minerals Roundtable, Boise, Idaho, 2024.

#### INTELLECTUAL PROPERTY

- Patent pending, sole inventor: rapid regeneration method for lithium-selective layered sorbents. Assigned to Halide Loop Technologies, Inc.

#### PROFESSIONAL SERVICE

- Reviewer, *\*Journal of Selective Separations\** (2023 – present), 11 manuscripts reviewed.
- Reviewer, *\*Applied Brine Chemistry Letters\** (2024 – present).

#### LANGUAGES

Estonian (native), English (fluent), German (working), Russian (conversational).
